RECENT SHIPS

MAY 2026	● First PR to Anthropic's MCP SDK — stdio fix
APR 2026	● Launched rewind v0.1.4 — 4 hot-fix releases in 48h
MAR 2026	● Shipped spent v0.5.1 — 25K+ impressions
JAN 2026	● Built STRATUM — 28K+ FDA / 2K EMA pipeline

CURRENTLY

BUILDING	● First PR to Anthropic's MCP SDK — stdio fix
LEARNING	Distributed systems · PostgreSQL internals · DeepLearning.AI Specialization

PROCESS

- mypy strict — types non-negotiable
- Real-session smoke tests — CI misses the bugs that bite users

PROFILE

Third-year engineering student at La Salle Barcelona maintaining **four Python packages on PyPI** for AI-agent tooling — observability, cost tracking, security and code quality for Claude Code workflows. Shipped **four hot-fix releases in 48h** after rewind's launch, all triggered by a real-session smoke test that caught two Windows-only bugs CI had missed. mypy strict, multi-OS CI green, release notes treated like product changelogs. **Open to AI/ML engineering roles in Barcelona — summer 2026.**

SELECTED PROJECTS

rewind — time-travel debugger for AI PyPI · rewindx v0.1.4 MIT

agent sessions

- Captures every prompt, tool call, file edit and cost into a per-session SQLite (WAL) + content-addressed blob store; enables timeline scrub, rollback, undo, privacy-masked Markdown export
- **141 tests · 88% branch coverage** · CI green on Python 3.11/3.12/3.13 across Linux · macOS · Windows — plus a **real-session smoke test** that caught two Windows-only bugs CI missed

```
$ pip install rewindx $ rewind cc setup ✓ Hooks installed in  
~/.claude/settings.json # Time-travel debugging is now active.
```

Python · anyio · Click · Rich · SQLite (WAL) · content-addressed storage · pytest · ruff · mypy strict

STRATUM — regulatory intelligence platform for pharma loplop.xyz

- Full-stack AI platform extracting FDA Complete Response Letters & EMA objections for compliance teams — processed **28,961 FDA · 418 CRLs · 3,307 objections · 2,296 EMA** through NLP + graph knowledge representation
- Multi-store data model: **PostgreSQL (relational), Neo4j (graph), Weaviate (vector)** — multi-dimensional regulatory search across structured, semantic and relational dimensions

Python · FastAPI · Next.js · PostgreSQL · Neo4j · Weaviate

spent — cost tracker for AI agent sessions PyPI · spent v0.5.1 MIT

- Real-time terminal dashboard tracking AI session costs with model detection, per-model breakdown and token-level analysis
- **220+ tests**; launch post reached **25K+ impressions, 100+ engagements** on LinkedIn

Python · Rich · SQLite · JSONL · Claude Code Hooks

mcpguard — OWASP MCP Top 10 security PyPI · guardmcp MIT

scanner via AST analysis

debtX — A-F static-analysis grader for AI-generated code PyPI · debtX MIT

EDUCATION & DISTINCTIONS

La Salle Barcelona — Universitat Ramon Llull 2023 – Present
Bachelor of Engineering in OTIC (ICT & Telecommunications) — **Year 3 of 4**
1st place — RSME National Math Competition · video category, 2020
