PROFILE

Third-year AI software engineering student at La Salle Barcelona, focused on building and shipping production-grade developer tools for AI agents. Author of four maintained Python packages on PyPI covering observability, cost tracking, security, and code quality for Claude Code workflows. Hands-on across Python, async systems, full-stack web, and developer tooling. Open to AI/ML engineering internships and entry-level roles starting summer 2026.

TECHNICAL SKILLS

Languages	Python, TypeScript, SQL
Backend	FastAPI, Next.js, PostgreSQL, Neo4j, Weaviate, SQLite
AI / ML	Claude API, Model Context Protocol (MCP), LLM integration, NLP, prompt engineering
Tools	Git, GitHub, pytest, ruff, mypy, multi-OS CI, Rich (TUI), Linux, Docker

PROJECTS

rewind — Time-Travel Debugger for Claude Code Sessions GitHub · PyPI

- Open source time-travel debugger that captures every prompt, tool call, file edit, and cost from a Claude Code session into a per-session SQLite + content-addressed blob store
 - Enables timeline scrubbing, file-system rollback to any prior checkpoint, undo, and privacy-masked Markdown export for replay-sharing
 - 141 tests with 88% branch coverage, multi-OS CI (Python 3.11/3.12/3.13 × Linux/macOS/Windows), v0.1.4 published on PyPI
- Python, anyio, Click, Rich, SQLite (WAL), content-addressed storage, pytest, ruff, mypy strict*

spent — Claude Code Session Cost Tracker GitHub · PyPI

- Real-time terminal dashboard tracking AI session costs with model detection, per-model breakdown, and token-level analysis
 - Published on PyPI (v0.5.1) with 220+ tests; launch post reached 25,000+ impressions and 100+ engagements on LinkedIn
- Python, Rich, SQLite, JSONL, Claude Code Hooks*

STRATUM — Regulatory Intelligence Platform for Pharma loplop.xyz

- Full-stack AI platform that extracts and analyzes FDA and EMA regulatory objections for pharmaceutical compliance teams
 - Processed 28,961 FDA documents, 418 Complete Response Letters, 3,307 objections, 2,296 EMA records through an NLP pipeline with graph-based knowledge representation
 - Multi-store data model spanning relational (PostgreSQL), graph (Neo4j), and vector (Weaviate) databases for multi-dimensional regulatory search
- Python, FastAPI, Next.js, PostgreSQL, Neo4j, Weaviate, Claude API*

mcpguard — MCP Security Scanner GitHub · PyPI

- Security scanner for Model Context Protocol servers with full OWASP MCP Top 10 coverage; detects hardcoded secrets, prompt injection vectors, missing authentication, and unsafe tool permissions via AST analysis
- Python, AST analysis, OWASP security framework*

debtX — AI Code Debt Scanner GitHub · PyPI

- Static analysis tool that grades AI-generated code on an A–F scale, identifying technical debt patterns specific to AI-assisted development
- Python, static analysis, pattern matching*

EDUCATION

La Salle Barcelona — Universitat Ramon Llull Barcelona, Spain · 2023–Present
Bachelor of Engineering in OTIC (ICT & Telecommunications) — Year 3 of 4

CERTIFICATIONS

- **Machine Learning Specialization** — Stanford University / DeepLearning.AI (2026)
- **Generative AI Engineering Professional Certificate** — IBM / Coursera (2026)
- **Claude Code in Action** — Anthropic (2026)

LANGUAGES

Spanish — Native **English** — Advanced (C1) **Dutch** — Intermediate (B1)
